DETAILED ACTION

Allowable Subject Matter

1. Claims 1-28 are allowed.

The following is an examiner's statement of reasons for indication of allowable subject matter: claims 1 and 16 recite, inter alia, "A package structure of an organic electroluminescence (OEL) panel, comprising: at least one patterned organic light emitting layer, disposed over the substrate, wherein the patterned organic light emitting layer exposes the contact region; and a plurality of second electrodes, disposed on the patterned organic light emitting layer". The above limitations advance the system to provide a package structure for the OEL panel with less issue on low stress force and better conductivity; and in which multiple OEL panels can be assembled to the same printed circuit board, so as to breakthrough the restriction of size for the large size.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations. The instant application is deemed to be directed to a nonobvious improvement over the invention patented in Pat. No. 5,747,363, Pat. No. 6,496,973, and Pat. No. 6,621,213. Although Wei et al (U.S. 5,747,363) teaches a method of fabricating an integrated electro-optical package comprising an organic device, Kusuda et al (U.S. 6,496,973) teaches a method of designing a mask pattern for a self scanning light-emitting device, and Kawashima (U.S. 6,621,213) teaches an organic electroluminescence device comprising an organic electroluminescence light emitting film formed over a portion of the transparent electrode film, however they do not teach the above mentioned limitations.
